

The [Business and Climate Summit](#) (20-21 May 2015) provides a platform to highlight business solutions towards a low-carbon economy and discuss the frameworks and policies needed to deploy low-carbon solutions. It convenes both international business leaders and policymakers to encourage dialogue between public and private actors and to build momentum towards a climate agreement in December 2015 in Paris, France. In response to UN Secretary-General Ban Ki-moon's call for the private sector to take a more active role in addressing climate change, the summit offers business leaders and policymakers an opportunity to discuss how to scale up low-carbon solutions. This Summit is the main event of Climate Week Paris (19-22 May).
